Projects

Portfolio Website

- I have crafted a personal portfolio website using technologies such as HTML, CSS, JavaScript, and Bootstrap. The website showcases my skills in web development and serves as a platform to highlight various projects.

Amazon Clone

- Designed and implemented a full-stack e-commerce clone project, replicating the functionality and user interface of Amazon. Utilized HTML, CSS, JavaScript, Node.js, MongoDB and Strip API for secure payments. Showcasing the ability to create responsive and feature-rich web applications.

To-Do list app

- Developed a dynamic To-Do list project using HTML, CSS, and JavaScript showcasing responsive design and interactive user interface. Implemented features for adding, editing, and deleting tasks.
- Prioritized a clean and modular code structure, showcasing strong coding practices. This project not only demonstrates my commands over frontend technologies but also underscores my ability to create intuitive and efficient user experiences.
